Academic Project & Thesis

Travel Mate Finder Android App (2018)
- A platform where people who loves to travel can find their travel companion
- Travelers can communicate with each other through one to one & group chat conversation systems.
- Users can create travel plans & manage those plans.
- There is also a GPS tracking feature through which one user can find the location of his/her friend.
- **Technologies:** Java, XML, Android Studio, Firebase Database, Google Maps API.

A Visual Speech Recognition System for Bangla Language
- Predicting Bengali words from only video (own made dataset) without any use of audio signal.
- **Technologies (Model):** Bi-directional GRU and convolutional neural network.
